DAVID DONOHUE
MANAGING DIRECTOR

“As Managing Director of IXSURVEY AUSTRALIA my role is to ensure our clients' surveys are undertaken with precision and to meet budgets, schedules and survey standards.

My particular driving passion is innovation and process improvement. I'm not happy with the status quo - I regularly challenge the industry and our operations and technology to constantly improve efficiencies and solutions.

My long term goal is to play an active role in accelerating the enormous task of surveying and charting the waters around Australia, a task which is currently undertaken by the RAN. I firmly believe that outsourcing the Australian hydrographic survey and charting program to industry will provide the Australian government with significant cost savings, an improved return on investment and increased economic and safety benefits for Australia.”

BIO

David and his team have been awarded numerous hydrographic surveys by Land and Information New Zealand, and have also conducted marine surveys of various types for government authorities and exploration companies around Australia and in Papua New Guinea.

Prior to joining IXSurvey Australia, David spent many years with the Royal Australian Navy. Further bio details available on request.
